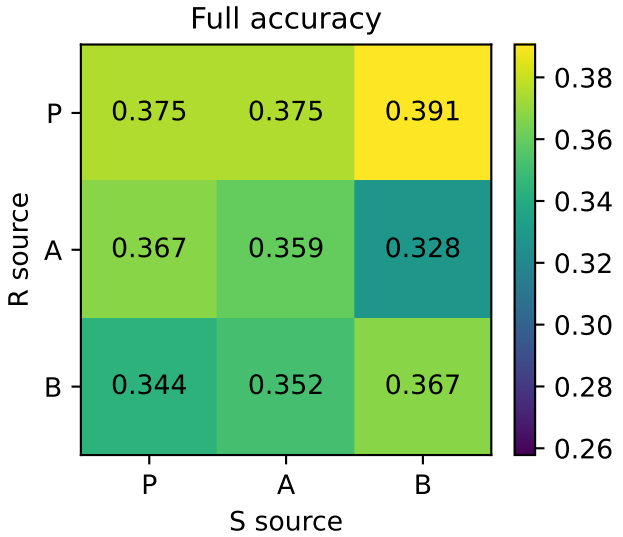
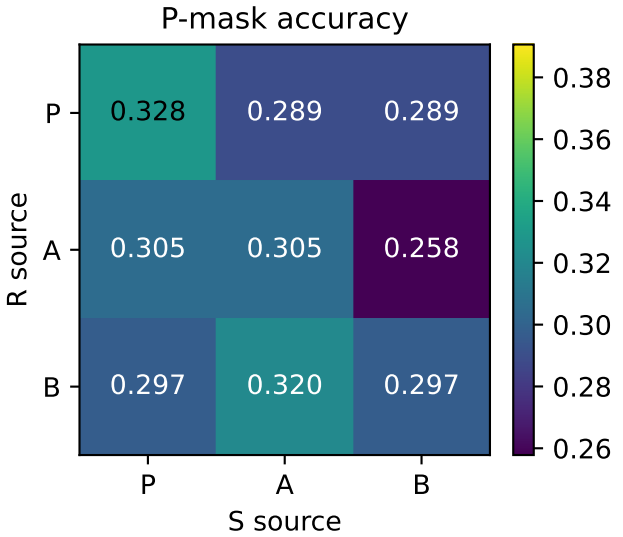
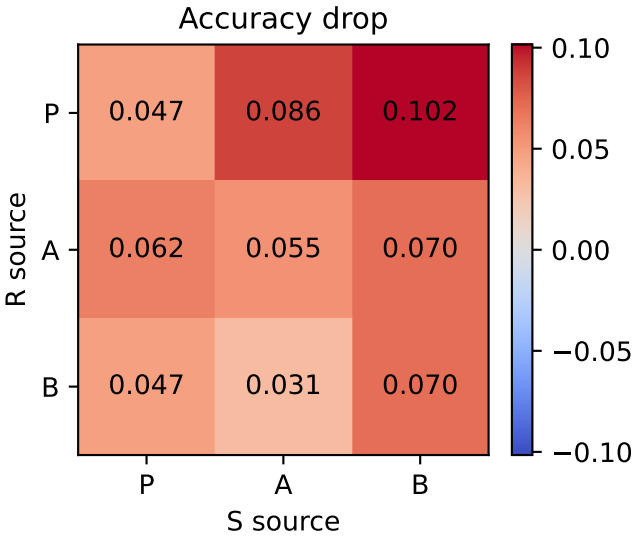
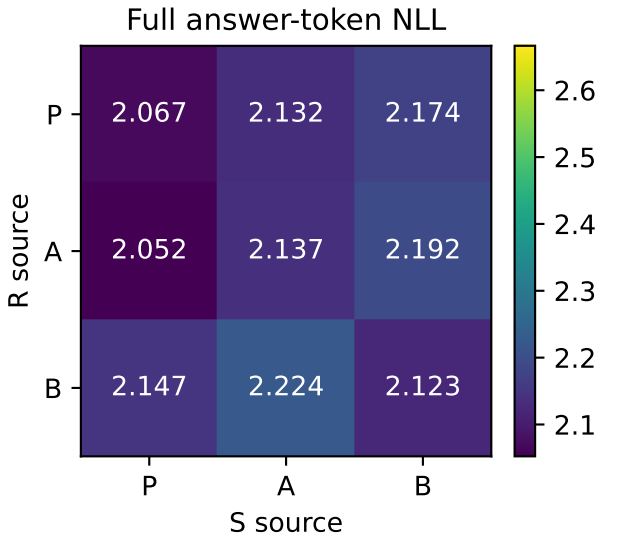
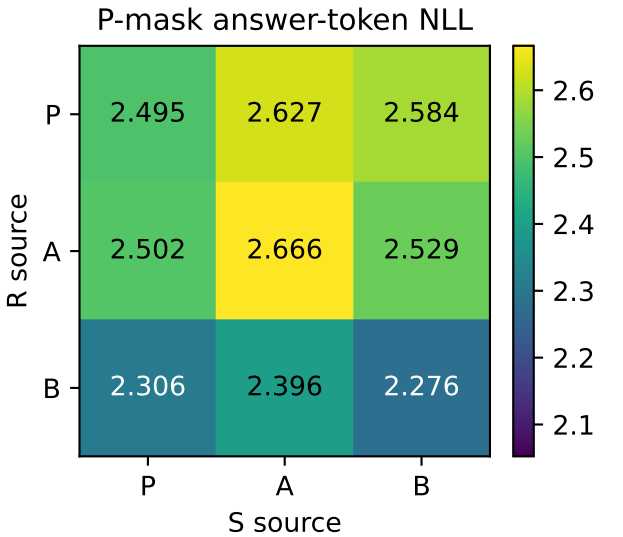
E156: R/S source cross in common P receiver (D/G = P)
All questions (64 biology + 64 mathematics)

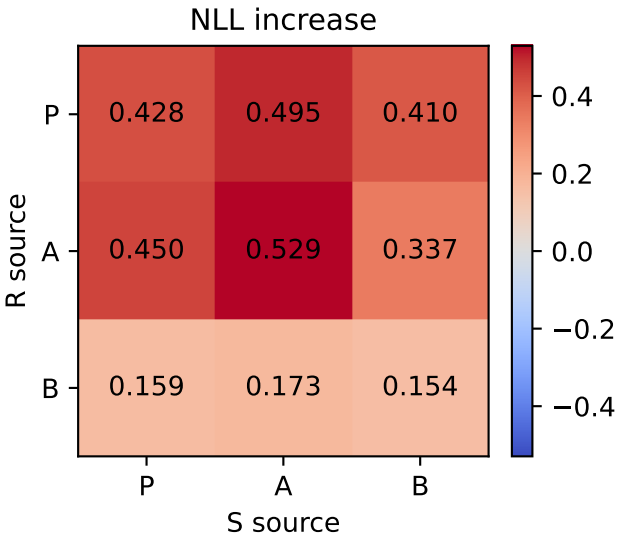












Native reference, full / P-mask: accuracy P 0.375 / 0.328 / A 0.414 / 0.281 / B 0.391 / 0.352
Native reference, full / P-mask: answer-token NLL P 2.067 / 2.495 / A 1.988 / 2.524 / B 2.008 / 2.104
A/B same-source advantage (same − cross accuracy): full +0.023 [-0.008, +0.055]; P-mask +0.012 [-0.023, +0.043]
A/B matching contrast (cross − same NLL): full +0.078 [+0.058, +0.098]; P-mask -0.009 [-0.042, +0.023]
A/B budget damage contrast (cross − same): accuracy drop -0.012 [-0.059, +0.039]; NLL increase -0.087 [-0.120, -0.051]
Intervals: paired question bootstrap within each fixed subject, equal subject macro. A/B contrast excludes the P/P identity corner.
