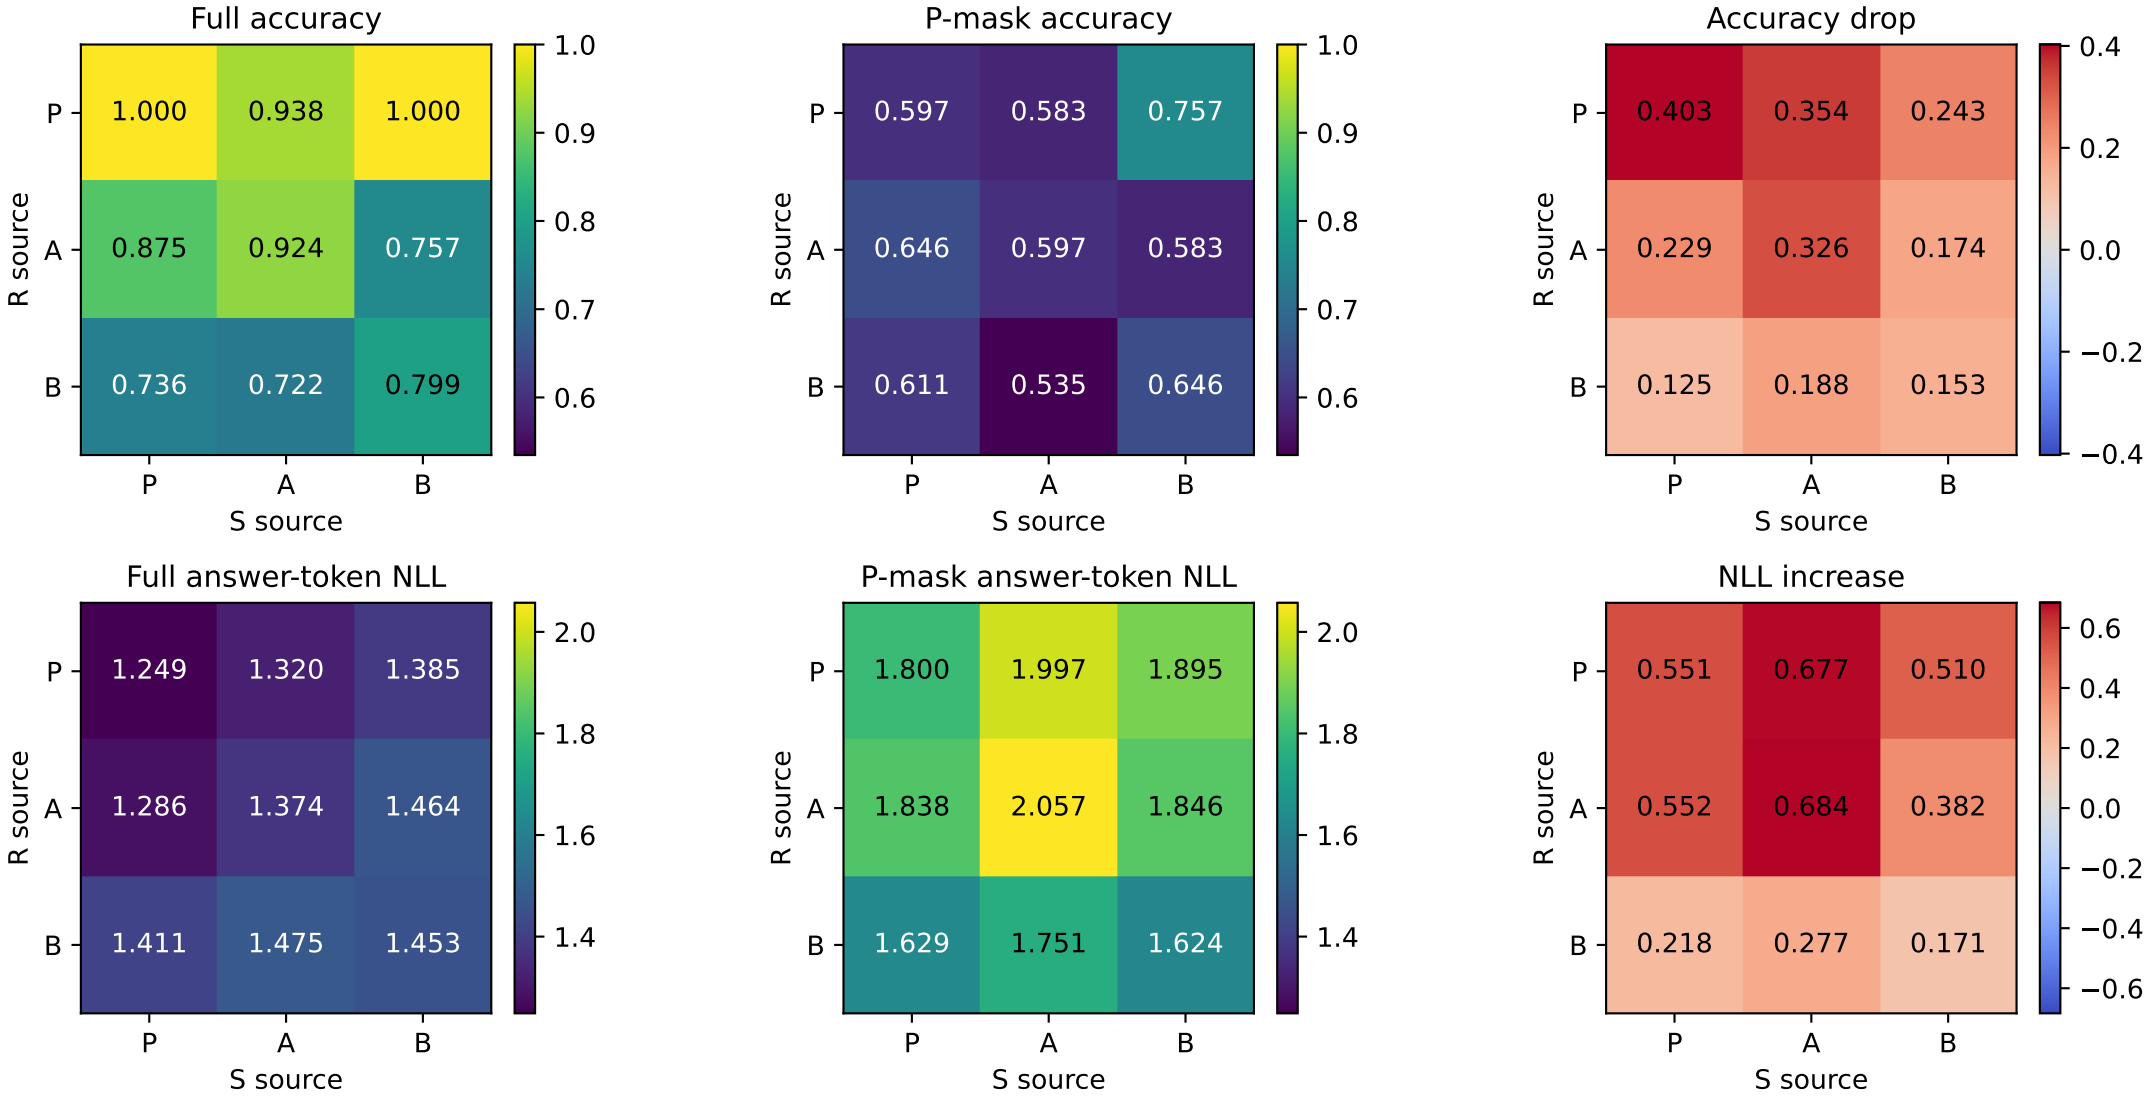
E156: R/S source cross in common P receiver (D/G = P)
Common native success (44 questions: 36 biology + 8 mathematics); not independent confirmation



Native reference, full / P-mask: accuracy P 1.000 / 0.597 / A 1.000 / 0.458 / B 1.000 / 0.757
Native reference, full / P-mask: answer-token NLL P 1.249 / 1.800 / A 1.241 / 1.833 / B 1.267 / 1.407
A/B same-source advantage (same − cross accuracy): full +0.122 [+0.045, +0.208]; P-mask +0.062 [-0.097, +0.201]
A/B matching contrast (cross − same NLL): full +0.056 [+0.023, +0.090]; P-mask -0.042 [-0.110, +0.032]
A/B budget damage contrast (cross − same): accuracy drop -0.059 [-0.212, +0.090]; NLL increase -0.098 [-0.176, -0.017]
Intervals: paired question bootstrap within each fixed subject, equal subject macro. A/B contrast excludes the P/P identity corner.
